

## The Vico Structured Evaluation Program

Have you always wanted to learn more about Vico's solutions but didn't know where to start?

Our Structured Evaluation Program is designed to guide you through our 3D-4D-5D BIM solutions. The program is specifically for firms who want to go deep with Enterprise BIM: this means moving beyond 3D models to advanced processes for coordination resolution, constructability reviews, scheduling, cost planning, and on-site production control.

\*Please note: this program is for **qualified General Contractors, CMs, Builders and Consultants to them.**

Our aim is to completely support qualified participants who are interested in understanding the enterprise nature of Vico Office. If you are just curious and want to learn more, we recommend you watch our BIM for Dummies video series, including [5D BIM for Dummies](#) and [BIM-Based Estimating for Dummies](#).

But if you are a General Contractor, CM, Builder and Consultants to them and want to better understand Vico Office and learn what is possible today, then here are the steps for our Structured Evaluation Program:

**Step 1. Short introductory call** confirming the overall goals, the timeline, and the parties that will be involved.

**Step 2. Setup call** (can be directly after the intro call), this is to review the operating system, workstation, and network requirements with a member of your IT team.

**Step 3. Training:** 2-4 hour online session augmented by our short training movies that show each function in a 2- or 3-minute step-by-step video.

**Step 4. Weekly check in:** for the duration of the evaluation the Vico representative and your evaluator agree to a weekly 30-60 minute check-up call to discuss progress, questions, and opportunities.

**Step 5. Support:** telephone support by the designated Vico representative.

We look forward to working with you to reveal the benefits of Vico Office for your business.
